Product Information: StoneFace™ Blocks

FULL BLOCK (1 Face)

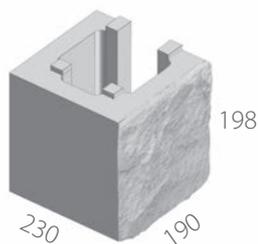

FULL CORNER (1 Face + 1 End)

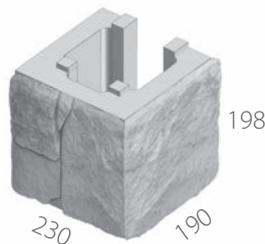

CAP

HALF BLOCK (1 Face)

HALF CORNER (1 Face + 1 End)

Note: Full Corners and Half Corners are universal. No right hand and left hand corners required.

Other configurations available on request. All dimensions are nominal and in mm.

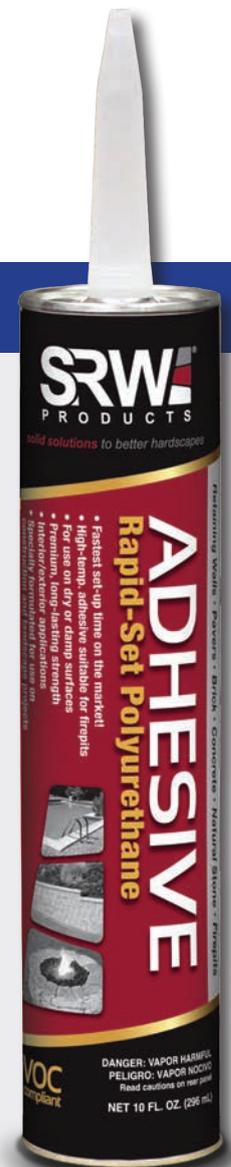

SRW Adhesive

Build your walls with SRW Adhesive instead of mortar and you'll save TIME & MONEY.

WHY ?

- ✓ Fastest set-up time on the market!
- ✓ High temperature adhesive suitable for firepits
- ✓ For use on dry or damp surfaces
- ✓ Premium, long lasting strength
- ✓ Interior/exterior use
- ✓ Specially formulated for use on construction and landscape projects

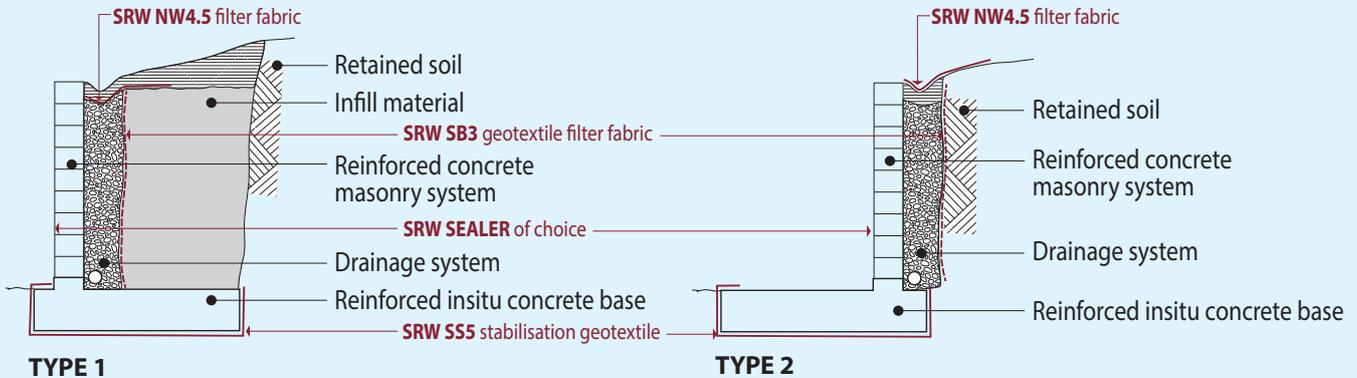

SRW Adhesive is a rapid-set polyurethane adhesive formulated to permanently bond concrete masonry block structures.

Retaining Wall Systems

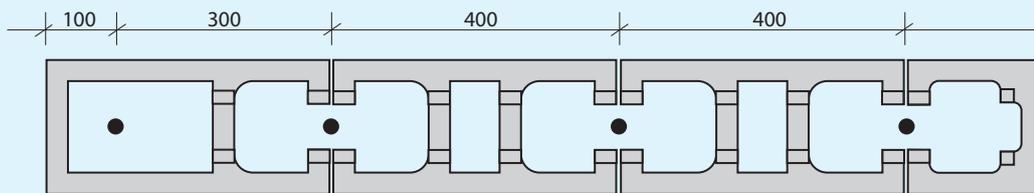

REINFORCED CANTILEVER RETAINING WALLS

Typical Arrangements of Reinforced Concrete Masonry Cantilever Retaining Walls

Starter Bar Set Out for Stone Face

Mortar may be required for the bottom course only

AUXILLARY PRODUCTS

Baines Masonry specialises in retaining wall products that are built to last, from SRW adhesive, geotextiles, geofabric (filter fabric) and sealers, you can count on our time-tested products.

EARTHWORKS™ RETAINING WALL SYSTEM up to 660mm high

No Concrete Footings, No Mortar.

Build beautiful and durable retaining walls at an astonishing low cost. **Earthworks™** retainers work on **StoneFace™** masonry blocks and create a mechanical connection with geogrid (if required) making it a winning combination for strength and durability. The retainers create a natural setback making them easy to use and install. **Earthworks™** is a low cost alternative and works for any wall up to 660mm.

StoneFace™ Finish

StoneFace™ is a new concept in architectural masonry developed by Baines Masonry.

This is a reconstituted stone finish inspired by our unique Australian landscape, both rugged and stunning, and comes in four finishes.

BushRock Blend

Charcoal Blend

YellowRock Blend

OpalRock Blend

StoneFace™ Block

The StoneFace™ block lends itself to a variety of uses:

- ✓ Retaining Walls
Steel and concrete reinforced cantilever, Segmental, using the EarthWorks™ retainers
- ✓ Feature Walls
- ✓ Entry Ways
- ✓ Fences
- ✓ Commercial construction
- ✓ Domestic construction

The block system is fixed using **SRW** thin bed masonry adhesive achieving the look of a dry stacked stone wall built by stonemasons in early Australia.

When constructing a segmental retaining wall the **Earthworks™** retainers enable a dry stacked retaining wall to be built. Then the use of the **SRW Adhesive** is only required for the capping units.

The bottom course must be level.
The use of mortar may be required.

StoneFace™ Profiles

StoneFace™ full blocks come in 6 profiles
