

Silt Fence & Stakes

Meets Most DOT Specs

SRW Silt Fence is a woven fabric that temporarily controls sediment on construction sites to protect water quality in nearby streams, rivers and lakes from sediment in storm water runoff. SRW Silt Fence comes with pre-attached posts. Stakes are pointed (like a pencil) for easy installation.

Rock Log

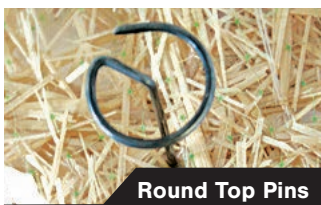

Rock logs are a woven monofilament tube sock filled on site with rock or aggregate to minimize runoff on hard surfaces or landscape areas.

Benefits

- ▶ First and last line of defense for filtration in roadways
- ▶ Traps particle sizes as small as .1 fine sand

QUICK TIP: Keep Your Erosion Control Products in Place!

Round Top Pins

Landscape Staples

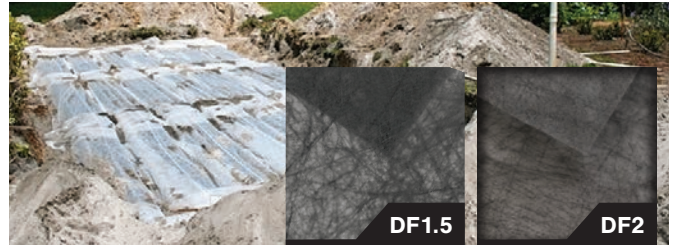

Round Top Pins and Landscape Staples

Round Top Pins and Landscape Staples prevent your erosion control products from movement and allows for easy visual inspection.

Don't miss our pin pounder and staple setter! They feature magnetic ends to make application easier.

Drainfield

SRW Drainfield polyester geotextiles are commercial-grade drainage fabrics with high puncture resistance. They provide high water flow rates and excellent filtration.

Silt Sock

Silt Sock is environmentally friendly for wetlands, waterways and general areas under construction.

Benefits

- ▶ Filters 90% of sediment from runoff
- ▶ Easy installation, low maintenance
- ▶ No equipment needed to install, reusable

Straw Wattles

Use these weed-free wattles over bare soil or in conjunction with erosion control blankets, on steep slopes, around drains for inlet protection or as perimeter control for jobsites.

Benefits

- ▶ Helps stabilize slopes by slowing, spreading and filtering overland water flow
- ▶ Flexible and conforms to the surface

Erosion Control Blankets

Erosion Control Blankets are produced from a material that is designed to slow down the speed at which water moves across the surface. These blankets also provide excellent protection for seeds and newly sprouted grasses or plants. SRW Products offers a variety of materials to fit your projects needs.

Straw Blankets

Benefits

- ▶ Certified 100% weed-free straw
- ▶ Erosion control up to one year
- ▶ Serves as a mulching layer

Straw Blankets

Excelsior Blankets

Benefits

- ▶ 100% Rocky Mtn. Excelsior material
- ▶ Erosion control up to 18 months
- ▶ Serves as a mulching layer

Excelsior Blankets

Coconut Blankets

Benefits

- ▶ Erosion control up to three years
- ▶ Serves as a mulching layer
- ▶ Option of coconut or straw/coconut mixture

Coconut Blanket

Turf Reinforcement Mat

Benefits

- ▶ Erosion control greater than 3 yrs.
- ▶ Turf reinforcement for more severe slope applications

Turf Reinf. Mat

QUICK TIP: Looking for More?

We've worked to deliver the best, most comprehensive erosion and sediment control solutions available in the industry. Between creating our own products and developing partnerships with industry leaders like Dandy Products, we've got you covered. Every construction project needs an SRW Products approved solution.

Dandy Products

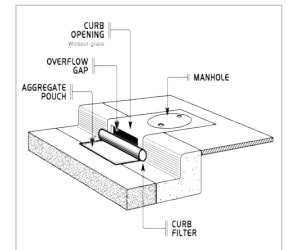

Soil erosion during construction can find its way to the city's water system through storm sewers, grates and inlets. Because of the potential danger, the government has required contractors to use a professional-grade inlet filter and to erect their own sediment control solutions and measures when starting new projects.
